## About Bulk IP Lookup

Bulk IP Lookup geolocates multiple IP addresses at once. You can also download the geolocation result as a CSV file. CSV file contains the following data: IP, Country, City, Region, ZIP, Timezone, ISP, Organization, ASN, Latitude and Longitude. Our bulk IP lookup tool can instantly output location of up to 100 IPv4 and IPv6 addresses. All the locations will be marked on Google Maps.

Note: If the IP address provided by you is within a private range or reserved range, then you'll get an error instead of the country name. Please contact us if you have any suggestions for our IP checker or if you want
